Sew everything. To get the face and head the right shape you are going to have to sew and pull it into place.

The hamster would look like a corn dog with eyes before fixing the face. I pull the eyes closer together and anchor it to the bottom between rnd 5-6. To get the slight neck I go around at post between Rnd 9-10 on the bottom towards the left side and anchor it behind left ear and I do the same for the right side
